# Joachim Herz Award

## “Future Pioneers in Sustainable Biotechnology”

**Are you researching sustainable biotechnology for a fossil-free future?  
The Joachim Herz Award supports early-career, interdisciplinary researchers  
who provide innovative impetus for a sustainable future with socially  
relevant research projects.**

### The research award supports

- ◆ Early-career scientists with a doctorate in natural sciences or engineering
- ◆ Interdisciplinary and practice-oriented research projects
- ◆ New processes and applications for resource-saving biotechnologies

### Participation

- ◆ Open to individuals or research teams from a German university or research institution
- ◆ By nomination or application
- ◆ Deadline for submissions: **March 31, 2025**

### Further information

The Joachim Herz Foundation is a modern non-profit foundation. It is based in Hamburg, Germany and promotes innovative, application-oriented research at the interfaces between business, engineering, natural sciences, and medicine. It also supports talented trainees on their career path by promoting education with a focus on transatlantic experience, personal skills, and the digital transformation in vocational training. These areas of activity are complemented by the facilitation of projects in the field of German-American exchange.
